New Features

Release (26.1.1.1917)

Block Customer/Vendor

- Customer and Vendor can now be automatically blocked if they have had no transactions within a user-defined number of years.
- An excel report can be downloaded to view which Customer and Vendor will be blocked.
- User preferred Blocking values will be assigned as new Blocked value for Customer and Vendor.

Anonymization of Customer/Vendor

- Enables anonymization of personal and business data for Customer/Vendor with no recent activity according to the given number of years.
- Specific Customer/Vendor can also be anonymized.
- Selective anonymization is available based on Dimension Filters and other criteria.
- Option to include/exclude Dimension Values during anonymization.

Detailed Report

- A comprehensive report is generated before taking any action, listing all Customer and Vendor eligible for anonymization or blocking.
- Ensures compliance tracking and internal audit readiness.
- Facilitates review and confirmation before irreversible data changes.

Activity Logging for Anonymization

- Logs are automatically maintained for each anonymization action performed.
- Enhances transparency and compliance documentation.
