## New Features

*Release - 26.1.1.1910*

### Shipment Creation

- Added support for creating different types of shipments directly from the PostNord Custom Shipment List page:
  - Standard Shipment
  - Return Pick-up
  - Return Drop-off

### Sales Order & Manual Shipment Support

- Create shipments by selecting a Sales Order/Sales Return Order (auto-fills customer and package data).
- Alternatively, create manual shipments by entering consignee details.

### Package Line Generation

- Auto-generates package lines from sales lines or allows manual entry via subform.

### Delivery Options & Additional Services

- Integrated PostNord's API to allow selection of delivery methods and service points.
- Supports multiple additional service codes per shipment.

### PDF Label Generation

- Label generation modes supported:
  - Per Package Line
  - Per Shipment
  - Manual (Specify Number of Labels)

## Return Shipment Flows

- Built-in support for both return methods:
  - **Return Pick-up** with pickup address in label
  - **Return Drop-off** with QR code for drop-off

## Tracking and Status Updates

- View tracking status directly from the shipment page.
- Auto-update status using Job Queue (background fetch).

## Logs

- Shipment Logs: Tracks user actions.
- Developer Logs: Displays API payloads and error responses for troubleshooting.

## Test Mode Indicator

- Enables visual TEST MODE banner when using PostNord's test environment.

## *Release - 26.1.2.2267*

## Simplified Shipment Creation

We've streamlined how shipments are created in the PostNord Connector for a more focused and intuitive experience.

- Removed shipment creation from the **Sales Order** and **Sales Return Order** cards to reduce complexity.
- Shipments can now be created only from the **PostNord Custom Shipment** Page.
- Updated logic to automatically link shipments with the correct source documents:
  - **Posted Sales Shipment** for standard shipments.
  - **Posted Return Receipt** for return shipments.

## Help & Resources

- Added an **About PostNord Connector** action to give users quick access to app-related information.
- Added a **User Guide** action, allowing users to open documentation directly within the app.

This update simplifies shipment management and improves accessibility to key resources within the PostNord Connector.
