New Features and Enhancements

Release - 26.1.1.1748

Integration Setup

Users can connect to their Sproom environment by providing their Sproom environment URL and Access Token details.

Sproom Logs

User can view list of API call sent to and received from Sproom with the option to drill further down into the API call details.

Log Retention Policy

Users can set up automatic log cleanup with retention policies.

Sending Sales Document to Sproom

Users can send Posted Sales Documents (Invoice & Credit Memo) to Sproom in OIOUBL format.

Digital Voucher Attachment

Users can also send digital voucher with the Posted Sales Documents to Sproom.

Batch Document Receiving

Users can batch receive Purchase E-Documents from Sproom which are automatically mapped as relevant Purchase documents in BC.

Compatibility with BC Version 26

The app has been made compatible with Business Central version 26.0 release.

Release – 27.1.0.2424

E-Document Service

Sproom has been introduced as a new integration service and can be configured as an E-Document Service.

Integration Setup

A new dynamic option in the integration setup allows users to select the Sproom environment they want to connect to.

Sproom Logs

Users can now view logs for both incoming and outgoing documents directly through the configured E-Document Service, eliminating the need for custom log maintenance.

Log Retention Policy

Automatic log cleanup using retention policies is **not included in this release** and will be considered for a future update.

Sending Sales Document to Sproom

Users can now send Sales documents (Invoices and Credit Memos) via the E-Document Service, with support for both OIOUBL and PEPPOL formats.

Digital Voucher Attachment

Attachment support is available only for documents in PEPPOL format, in line with Microsoft's current capabilities.

Batch Document Receiving

Incoming documents from Sproom can be batch received and automatically mapped to Purchase documents in Business Central for existing vendors.

Compatibility with BC Version 27

The app has been made compatible with Business Central version 27.0 release.
