# New Features

*Release – 26.1.0.1824*

## Microsoft AppSource Transact

Key Changes:

- **New AppSource Transact Model** - Now available for all new subscriptions.
- **Side-by-Side Support** - Existing Stripe subscriptions will continue to work during the transition period.
- **Transition Plan** - Customers will receive advance notice about the Stripe model discontinuation date and migration process

Next Steps for Customers:

- New customers will automatically use the AppSource Transact model.
- Existing customers can continue using their Stripe subscriptions until the announced transition date.
- Detailed migration instructions will be provided before the discontinuation.

# Enhancements And Bug Fixes:

*Release - 1.24.202448.1176*

## Comments on Customer Subscription Line

- Resolved an issue where users were unable to add line-specific comments to Customer Subscription Lines.
- Comments now function seamlessly, transferring correctly to the associated Sales Documents for improved communication.

## End Date on Customer Subscription Line

- Fixed a bug that required an End Date to be set, even for non-time-bound subscriptions.
- Users can now leave the End Date field blank for indefinite subscriptions without encountering errors.

## *Release - 1.24.202448.1183*

### Quantity on Customer Subscription Line

- Fixed an issue that prevented lines from being processed when the quantity was entered in decimals.
- Users can now enter quantities in decimal values as needed, ensuring greater flexibility.

## *Release - 1.24.202449.1204*

### Date Fields for Comments on Customer Subscription Line

- Resolved an issue that prevented users from entering dates on comment lines in the Customer Subscription Line when the Type field was left empty.
- Users can now successfully add dates to comment lines, even when no Type is specified, ensuring accurate and detailed information.

### Placeholders for Date in Descriptions on Customer Subscription Line

- Fixed a bug that caused placeholders for dates to fail to populate with actual dates when converting Customer Subscriptions to Sales Documents.
- Users can now rely on date placeholders to automatically populate with the correct date, streamlining the process of converting subscriptions to Sales Documents.

## *Release - 27.1.0.2922*

### Updated Stripe Authentication Compatibility

- Resolved the integration issue caused by Stripe's authentication update by replacing URL-based API key usage with Bearer Token authentication.

# Non-Technical Updates

*Release - March 2025*

New logo on AppSource

- Added new App logo on the AppSource
